Gilroy Foods & Flavors celebrates 50th anniversary

Gilroy Foods & Flavors is celebrating its 50th anniversary and commemorating the journey that has led it to become an industry leader and a pioneer in value-added vegetables, seasoning blends, and savory flavor systems.

The first garlic processing run in 1959 was the start of the company's journey to become a leader in vegetable innovation and savory flavors. In 2005, Spicetec, one of the largest industrial seasoning suppliers and savory flavor system leaders, was added to the company portfolio. Now a vegetables and flavor leader with nine locations, some of the company's other important milestones include the launch of RediMade shelf-stable garlic purée in 1987 and Seasoned & Flavored Controlled Moisture Vegetables in 2008.

"Our company has grown tremendously over the past half a century. Our heritage is the foundation of our successful growth" said Greg Estep, President of Gilroy Foods & Flavors. "We're proud of our deep roots and the evolution of our company, which is why we promise to continue our commitment to quality, safety, reliability, and innovation for the customers that have found us to be valuable partners over the years."
